Why Us

- ## Expert Knowledge

  We have delivered the highest number of standards and frameworks than any other player in Africa. DJA is the 1st Professional service provider certified to the ISO 27001 (global Information Security standard) and ISO9001 (global Quality Management standard) whist also being a Qualified Security Assessor for the Payment Card Industry Data Security Standard (PCIDSS QSA).

- ## Our References Tell It All

  We know, we care, and we deliver. We have delivered training and certification programs to clients across all industries

- ## Diversity

  Our team of professionals have led the development and implementation of pragmatic programs across a diverse range of industry sectors

- ## Track Record & Experience

  We have a strong track record in delivering best practice standards across Africa.
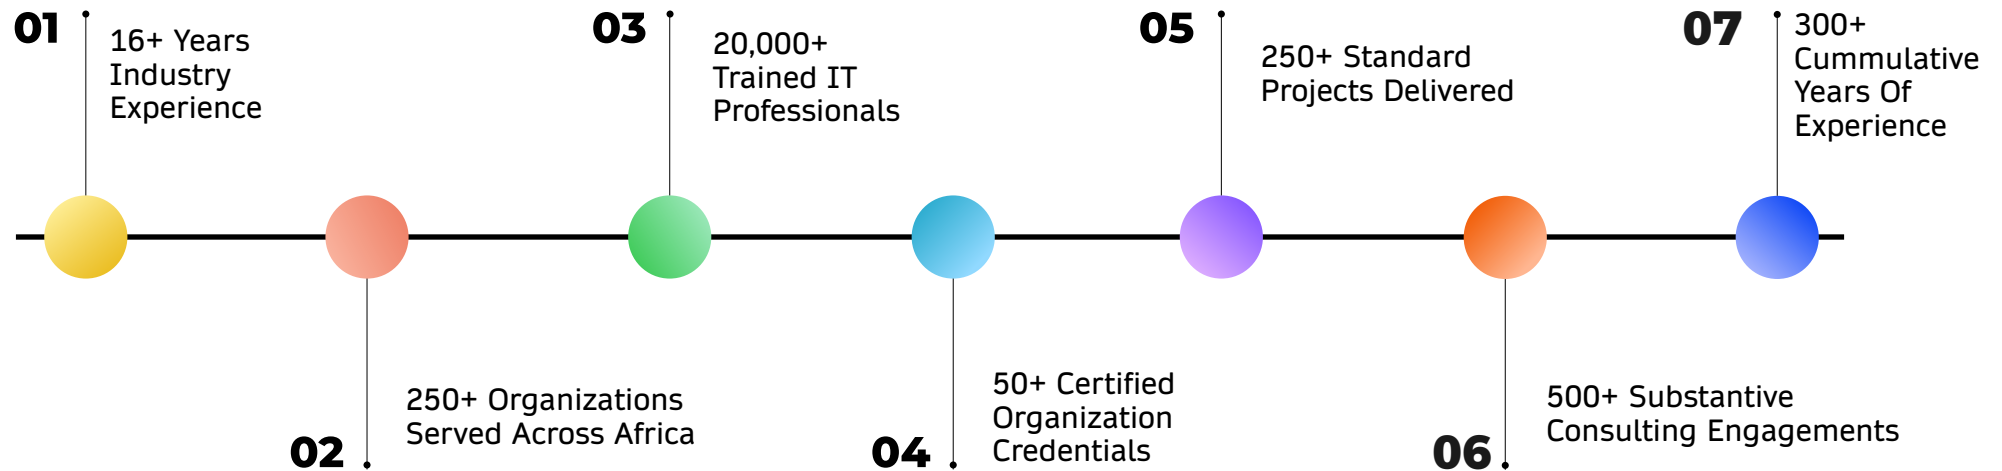

- ## Multi-Disciplinary Skills

  We can leverage on the multi-disciplinary skills of the entire DJA organization to offer an all-encompassing service.

INFORMATION SECURITY

● **ISO 27005 Information Security Risk Managemement**

The ISO/IEC 27005 training and certification course provides an understanding of the principles and processes of risk management in information security. It covers topics such as risk assessment, risk treatment, risk communication, and risk monitoring.

● **ISO 27001 Information Security management Systems (ISMS) Lead Implementer**

ISO/IEC 27001 Lead Implementer training enables participants to develop the necessary expertise to support an organization in establishing, implementing, managing and maintaining an Information Security Management System (ISMS) based on ISO/IEC 27001

● **ISO 27001 Information Security management Systems (ISMS) Lead Auditor**

Develop the necessary expertise to perform an Information Security Management System (ISMS) audit by applying widely recognized audit principles, procedures and techniques.

● **ISO 27035 Lead Incident Manager**

This course enables participants develop the necessary expertise on the fundamentals of managing and protecting information security incidents. It covers concepts such as principles and processes for managing incidents, and helps participants to build, manage and guide a security incident response team effectively.

INFORMATION SECURITY

● **ISO 18788 Security Operations Management Systems (SOMS) Foundation**

   Become acquainted with the best practices of Security Operations Management System based on ISO 18788

● **ISO 18788 Security Operations Management Systems (SOMS) Lead Implementer**

   Master the Implementation & Management of Security Operations Management System based on ISO 18788

● **ISO 18788 Security Operations Management Systems (SOMS) Lead Auditor**

   Master the Audit of Security Operations Management System based on ISO 18788

● **PECB Chief Information Security Officer – PECB CISO**

   This course enables participants master the ability to establish and monitor an information security program

COURSE
SUMMARY

INFORMATION SECURITY

● **Certified Information Security Manager (CISM)**

This course is designed for IT professionals with technical expertise and experience in IS/IT security and controls looking to transition from team player to manager. The CISM certification indicates expertise in information security governance, program development and management, incident management and risk management.

● **Certified Information Systems Auditor (CISA)**

CISA is world-renowned as the standard of achievement for auditing, monitoring, and assessing IT and business systems, also acknowledges the importance of emerging technologies. Addressing innovations like AI and blockchain, CISA ensures that IT audit professionals stay current on the latest technology trends and advancements.

● **Certified Information Systems Security Professional (CISSP)**

CISSP is one of the most globally recognized certifications in the information security market. The CISSP certification validates an information security professional's deep technical and managerial knowledge and experience to effectively design, engineer, and manage the overall security posture of an organization.

Digital Jewels Africa

IT FRAMEWORKS, STRATEGY & LEADERSHIP

COBIT® 2019

COBIT training and certification courses are designed to help IT professionals understand and implement the COBIT framework. These courses provide an overview of the framework, its components, and how to use it to improve IT governance, risk management, and compliance. The certification is a globally recognized credential that demonstrates a professional's knowledge and understanding of the COBIT framework.

TOGAF Enterprise Achitecture

Our TOGAF training and certification courses are designed to help individuals gain the knowledge and skills needed to become certified in the TOGAF framework. The courses cover topics such as architecture principles, architecture development methods, and architecture governance. Upon completion of the course, individuals can take the TOGAF certification exam to become certified.

ITIL® V4

The ITIL® certification scheme provides a modular approach to the ITIL framework and is comprised of a series of qualifications focused on different aspects of ITIL best practices to various degrees of depth and detail. The tiered structure of the qualification offers candidates flexibility relating to the different disciplines and areas of ITIL and the ability to focus their studies on key areas of interest

CYBERSECURITY

● Cybersecurity Fundamentals

Cybersecurity Fundamentals Certificate candidates demonstrate their understanding of the principles that frame and define cybersecurity, and the integral role of cybersecurity professionals in protecting enterprise data and infrastructure.

● ISO 27032 Lead Cybersecurity Manager

The Lead Cyber Security Manager training and Certification Course provides an understanding of the principles and practices of cyber security and the implementation of the ISO/IEC 27032 standard. It covers topics such as risk management, security controls, security architecture, and security operations. The certification provides a globally recognized credential that demonstrates an individual's knowledge and expertise in cyber security.

● ISO 27017 Lead Cloud Security Manager

This training course is designed to help participants acquire the knowledge and skills needed to support an organization in effectively planning, implementing, managing, monitoring, and maintaining a cloud security program based on ISO/IEC 27017 and ISO/IEC 27018

● Certified Ethical Hacker (CEH)

The CEH course provides an in-depth understanding of ethical hacking phases, various attack vectors, and preventative countermeasures. It will teach how hackers think and act maliciously so that participants will be better positioned to set up the necessary security infrastructure to defend against future attacks.

COURSE
SUMMARY

CYBERSECURITY

- **PECB Lead Ethical Hacker**

  The Certified Lead Ethical Hacker training course fosters digital trust by teaching professionals how to ethically identify and address vulnerabilities in information systems and networks.

- **PECB Penetration Testing Professional**

  Master Professional Penetration Testing

- **Cybersecurity Maturity Model Certification (CMMC) Certified Professional**

  Certified CMMC Professional training course enables participants to acquire a comprehensive understanding of the Cybersecurity Maturity Model Certification (CMMC) model and its requirements.

- **Certified Cloud Security Professional (CCSP)**

  The CCSP certification shows you have the advanced technical skills and knowledge to design, manage and secure data, applications and infrastructure in the cloud using best practices, policies and procedures established by cybersecurity experts around the globe.

- **Cybersecurity Awareness for Board & Executive Management**

  This program is designed to assist directors and top management gain an understanding of the cybersecurity landscape and at the same time, provide board members, the C-suite, and other senior executives with essential knowledge and perspective for cybersecurity strategy, leadership, and management. It explains the varying cybersecurity frameworks and regulatory requirements ("best practices") for managing cybersecurity-related risk.

CONTINUITY, RESILIENCE, AND RECOVERY

● **ISO 22301 Business Continuity Management Systems (BCMS) Lead Implementer**

Develop the necessary expertise to support an organization in establishing, implementing, managing and maintaining a Business Continuity Management System (ISMS) based on ISO/IEC 22301

● **ISO 22301 Business Continuity Management Systems (BCMS) Lead Auditor**

Thd ISO/IEC 22301 Lead Auditor training enables participants develop the necessary expertise to support an organization in auditing, managing and maintaining a Business Continuity Management System (ISMS) based on ISO/IEC 22301

● **Certified Digital Forensics Examiner (CDFE)**

The Certified Digital Forensics Examiner (CDFE) training provides the expertise to conduct digital forensic investigations and obtain legally admissible digital evidence. This course provides a comprehensive understanding of forensic analysis techniques across various platforms, including Windows, macOS, Linux, and mobile devices.

GOVERNANCE, RISK, & COMPLIANCE (GRC)

- **Certified Digital Operations Resilient Act (DORA) Lead Manager**

  This course equips delegates with the necessary skills to lead and oversee the implementation of digital operational resilience strategies within financial entities to help them ensure compliance with European Union's Digital Operational Resilience Act (DORA).

- **ISO 37301 Compliance Management Systems (CMS) Lead Auditor**

  Acquire the skills and knowledge necessary to conduct audits of compliance management systems based on ISO 37301 and the guidelines for auditing management systems provided in the ISO 19011 and the certification process presented in ISO/IEC 17021-1

- **ISO 37301 Compliance Management Systems (CMS) Lead Implementer**

  Develop the competence necessary for the establishment, implementation, maintenance, and continual improvement of a compliance management system based on ISO 37301

- **ISO 31000 Risk Management**

  The ISO 31000 Lead Risk Manager course is designed to provide individuals with the knowledge and skills to develop, apply, assess and maintain a successful risk management system. This course will help participants understand the concepts, frameworks and principles of risk management, and how they can be used to create better organizational outcomes

GOVERNANCE, RISK, & COMPLIANCE (GRC)

● **ISO 37001 Antibribery Management Systems (ABMS) Lead Implementer**

Acquire the necessary competencies to guide and support organizations to establish, implement, operate, maintain, and continually improve an ABMS based on ISO 37001

● **ISO 37001 Antibribery Management Systems (ABMS) Lead Auditor**

Develop the competencies to audit an ABMS against the criteria established by ISO 37001, based on the guidelines of ISO 19011 and requirements of ISO/IEC 17021-1

● **Governance, Risk and Compliance (CGRC) Certification**

The CGRC certification provides delegates with the expertise for the utilization of frameworks to integrate security and privacy within organizational objectives, better enabling stakeholders to make informed decisions regarding data security, compliance, supply chain risk management and more.

● **Certified in Risk and Information Systems Control (CRISC)**

Validate your proficiencies for handling the challenges and responsibilities of a modern risk management expert with a CRISC certification

● **Certified in the Governance of Enterprise IT (CGEIT)**

Validate your proficiencies for handling the challenges and responsibilities of a modern IT governance expert with a CGEIT certification

PRIVACY & DATA PROTECTION

● **ISO 27701 Privacy Information Management System (PIMS) Lead Implementer**

The ISO 27701 Lead Implementer course equips individuals with the skills to establish, implement and maintain a Privacy Information Management System (PIMS). It increases competence in privacy and data management, and ensures businesses remain compliant with global privacy regulations.

● **ISO 27701 Privacy Information Management System (PIMS) Lead Auditor**

The ISO/IEC 27701 Lead Auditor training course enables participants to develop the necessary skills to perform a Privacy Information Management System (PIMS) audit by applying widely recognized audit principles, procedures and techniques.

● **Certified Data Protection Officer (CDPO)**

This five-day intensive course enables participants to develop the necessary expertise to demonstrate their knowledge, skills and competence, for implementing, managing and aligning a privacy framework based on General Data Protection Regulation requirements.

● **Certified Data Privacy Solutions Engineer (CDPSE)**

This certification is focused on validating the technical skills and knowledge it takes to assess, build and implement comprehensive data privacy measures.

PROJECT MANAGEMENT

● **Project Management Professional (PMP)**

The Project Management Professional (PMP)® Certification course is designed to help participants prepare for the PMP® certification exam. It covers topics such as project management processes, tools, and techniques, project execution, control and closure, project planning, risk management, stakeholder management, and team dynamics. The course also introduces different approaches to project management and helps participants to develop their own skills and knowledge in project management. The course includes hands-on activities and simulations to help students apply the concepts they've learned.

QUALITY & MANAGEMENT

● **ISO 9001 Quality Management Systems (QMS) Lead Implementer**

This training course is designed to help participants understand the ISO 9001 basic concepts of a Quality Management System (QMS) and learn how to implement and manage a Quality Management System (QMS) as specified in ISO 9001.

● **ISO 9001 Quality Management Systems (QMS) Lead Auditor**

This course helps participants develop the necessary expertise to perform a Quality Management System (QMS) audit by applying widely recognized audit principles, procedures and techniques.

● **ISO 20000 IT Service Management (ITSM) Lead Implementer**

The ISO/IEC 20000 Implementer certifications are professional certifications for professionals needing to implement a Service Management System (SMS) and, in case of the ISO/IEC 20000 Lead Implementer Certification, needing to manage an implementation project

● **ISO 20000 IT Service Management (ITSM) Lead Auditor**

Our ISO 20000 Lead Auditor virtual training enables participants develop the necessary expertise to support an organisation in Auditing, managing and maintaining a Service Management System (SMS) based on ISO 20000

QUALITY & MANAGEMENT

● **ISO 45001 Occupational Health and Safety (OH&S) Lead Implementer**

Acquire the competencies to guide and support organizations in establishing, implementing, operating, maintaining, and continually improving an OH&S management system based on ISO 45001

● **ISO 45001 Occupational Health and Safety (OH&S) Lead Auditor**

This course will enable participants develop the competence to audit occupational health and safety management systems against the criteria established by ISO 45001 and the guidelines and requirements for auditing management systems provided in ISO 19011 and ISO/IEC 17021-1

DIGITAL TRANSFORMATION

- **Digital Transformation**

  This course is designed to enable participants master the implementation of a Digital Transformation Strategy. By undergoing this course, participants will be introduced to the digital transformation roadmap and acquire comprehensible knowledge on emerging technologies that help meet the changing business needs and expand the digital innovation landscape.

IT FUNDAMENTALS

- **Computing Fundamentals**

  This course will help candidates build a base-level knowledge and skillset through a hybrid learning approach of information technology (IT)—specifically in the areas of basic computing, networks, virtualization and security. The course will Expand and prove their understanding of how computers are used to gather, store, process and synthesize data—especially across networks.

- **Data Science Fundamentals**

  With the Data Science Fundamentals Certificate, candidates will be able to demonstrate an understanding of the key data analysis concepts and how to use data to help make informed business decisions.

- **Software Development Fundamentals**

  Learn the key concepts and principles of software development through a hybrid of knowledge-based lessons and hands-on training labs. Gain insight into software development methodologies, concepts, standards, and basics.

- **Networks and Infrastructure Fundamentals**

  Networks and Infrastructure Fundamentals offers the opportunity to build a base-level knowledge and skillset of the key concepts and terminology of computer networks and internets, network and infrastructure standards, protocols and models, basic network components, topologies, functions, and processes.

IT FUNDAMENTALS

● **IT Risk Fundamentals**

Our IT Risk Fundamentals Certificate covers the principles of IT risk management, the responsibilities and accountability for IT risk, how to build risk awareness and how to communicate risk.

● **IT Audit Fundamentals**

IT Audit Fundamentals Certificate builds a foundation of knowledge and skill to become a successful IT auditor. Our IT Audit Fundamentals Certificate covers fundamental audit concepts, how to use controls effectively to objectively conduct an audit, and the practical application of audit principles
